

January 7, 1976

the right authorities. Lieutenant Governor, you worked with me on this. Do you have anything to say about it?

PRESIDENT: No, sir, thank you, Senator Keyes. Senator Duis.

SENATOR DUIS: Mr. President, I wanted to ask a question, if I might, of the Speaker.

PRESIDENT: Senator Burbach.

SENATOR DUIS: Senator Burbach, if I remember correctly, some of these bills on Select File were put over there at the close of the session on the last day, and I believe, if I recall correctly, sir, they are over there on the same principal position that they would be on General File because the vote to advance some of these bills to Select File was done in that day, and there were quite a few of them, is that correct or not?

SENATOR BURBACH: There are only three, sir, LB 425, 477 and 383, I think is all that is bracketed. There is LB 204, I see, is bracketed on engrossment. Now as I indicated a moment ago, I have no objection if someone wants to move these bills now, the introducer, to unbracket them, or the individual who made the motion to bracket them but I did not want to put them on the agenda at this time in fairness to our habits of being prone for forgetfulness or forgetting why they were bracketed or forgetting the amendments. I have no concern if someone wants to unbracket but I did not feel as though I wanted to bring them up at this time. I may say something else, Senator Duis, now the bills that are on Final Reading, only three of them, I am not going to request that they be read on Final Reading for at least three days and maybe next Monday for this reason. There is possibly a doubt, I don't know when they were placed, if they have had their two days of being on Final Reading in the last session, but that was a session and now I believe that they should be on Final Reading for two days of this session. There is a question of whether we would be constitutionally correct in reading them today so we are asking that they not be considered for a period of three days.

SENATOR DUIS: Yes, I thank you very much and I understand that. The point that I was getting at was that there were a number of bills on General File that we put over to Select File the last day of the Legislature without consideration of any amendments. I believe, almost including some of the Committee amendments in order to have them advanced and I was wondering if you were going to treat those in the manner that we supposedly put them over there.

SENATOR BURBACH: If this is a part of the record of last session, I see no objections at this time to take them up. Again, I renew my request, unless it is the body's desire, to wait until possibly Monday for consideration of those bills so we can reacquaint ourselves with the issue.
